

MISSION STATEMENT

intimate is a cryptocurrency that provides payments and reputation for the adult industry, making it safer and more secure.

The adult industry includes everything from live camming and online content, escorting where legal, swinging and dating websites, novelties, lingerie and ecommerce sites as well as sexual health apps. Legal tax paying businesses in all of these categories have suffered bias, increased fees, frozen accounts etc due to the stigma that surrounds the adult industry.

In the adult services industry a provider's sense of safety and willingness to pursue new business is reliant on trusting clients. In the absence of trust, service providers need to take additional, often inadequate, security measures prior to meeting a client. Often they will simply choose not to meet the client thereby foregoing revenue.

Utility

- Transaction fees are burned to create feedback.
- Payment using two-party trustless escrow.

Staking

- To elect network validators.
- Stake is part of the rating algorithm, it can
 - Increase rewards.
 - Increase visibility within the intimate wallet.
 - Stakers can freely consume intimate APIs.

Transactional

- Low finality times for transactions.
- Low cost of transactions / smart contracts execution.
- Hedge against exchange risk.
- Payment channels for micro-transactions.
