Buyers Guide

**HOW TO BUY**

# Buyer's Guide

EXCHANGE SET UP

## A STEP BY STEP GUIDE TO ACQUIRING INTIMATE TOKENS

This document is designed to give you an overview of the how you can set up and acquire intimate tokens.

Please do your own research into which wallets and exchanges you use.

As is mentioned numerous times in this document, please take great care of your passwords. In crypto, if you lose your passwords there is not a password reset option.

If you have any issues throughout this process please email [kyc@intimate.io](mailto:kyc@intimate.io) or jump into our telegram group <https://t.me/intimatetoken>

Some of the wonderful partners who will be accepting intimate:

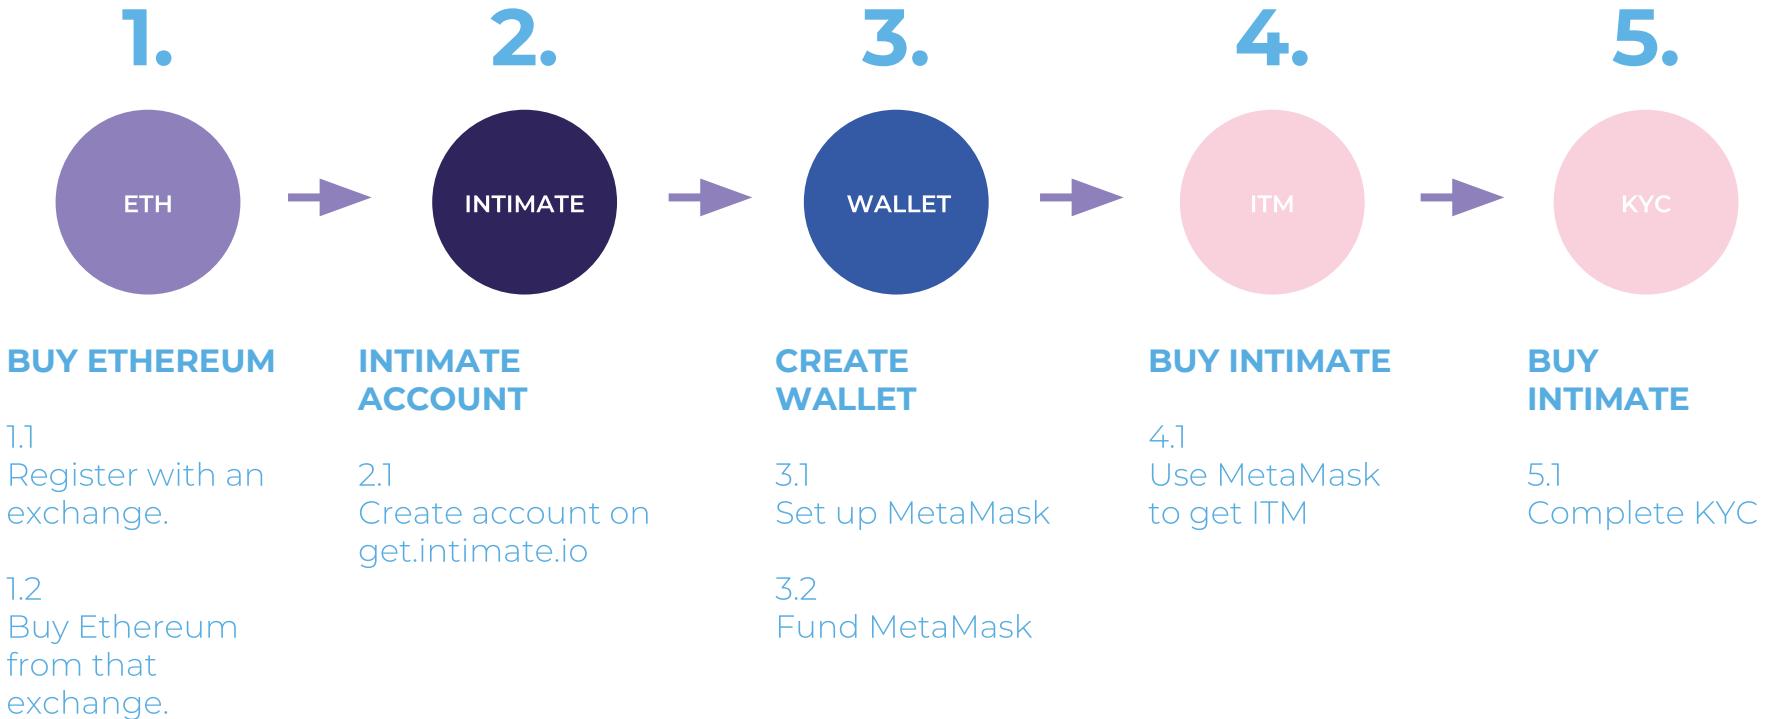

**3AM.XXX smile😊makers**

# Purchase Process Overview

BUYING INTIMATE

## GENERAL PURCHASE OVERVIEW

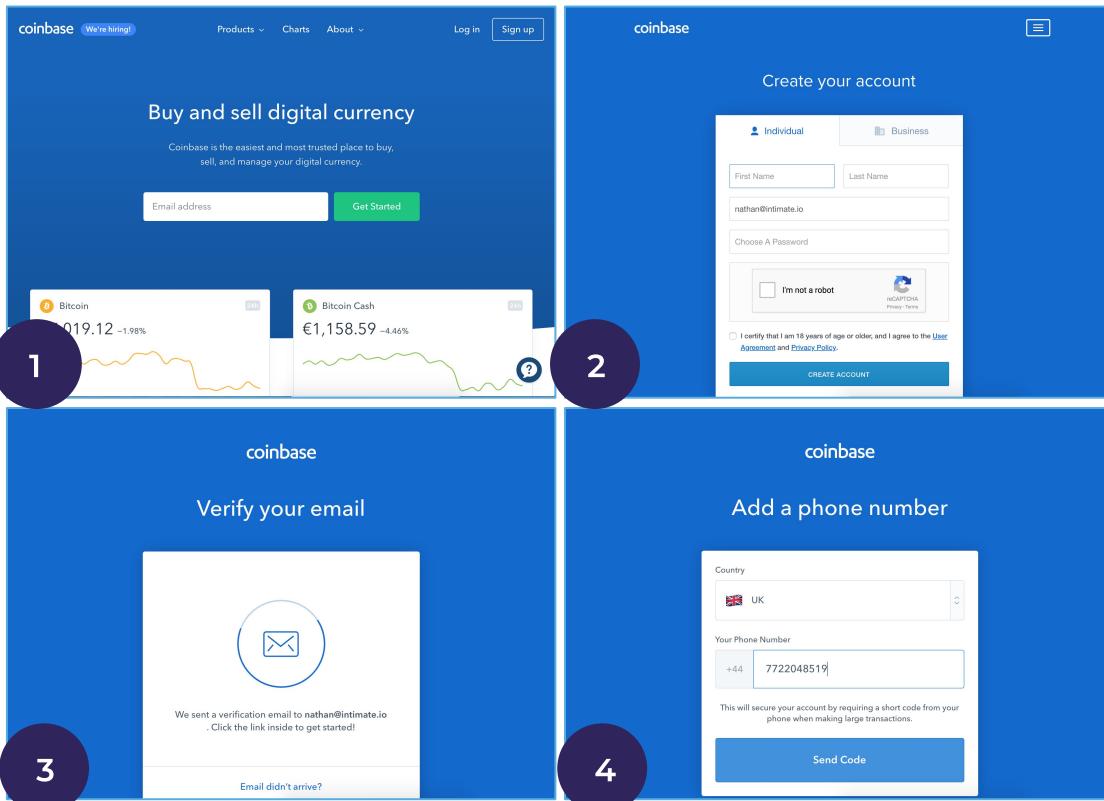

# STEP 1 BUYING ETHEREUM

The first step in the process is to purchase Ethereum from an exchange. This process is literally exchanging your fiat currency (AUD, USD, GBP) for a cryptocurrency (ETH). If you already have Ethereum, you can skip to Step 2.

# 1.1 Buying Ethereum

## REGISTERING WITH AN EXCHANGE

EXCHANGE SET UP

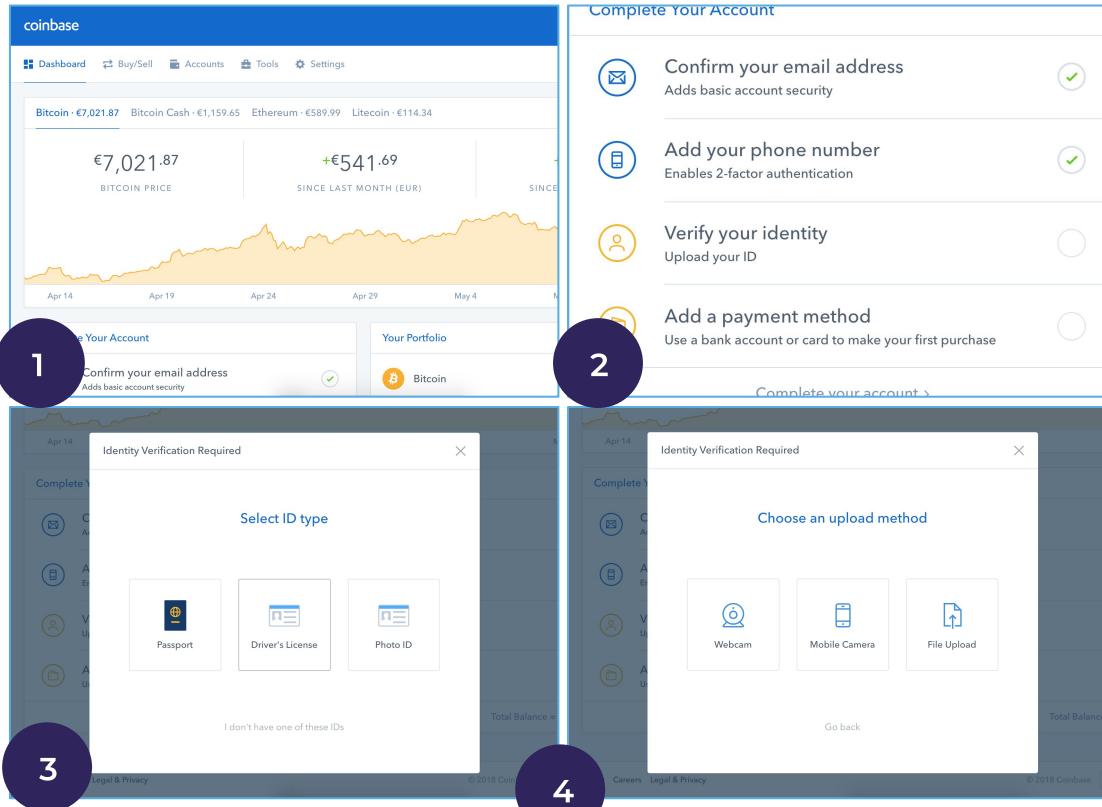

Do your own research to find which exchange you like the best. If in Australia, you can use Independent Reserve. For this UK example, we have used CoinBase.

1. Enter your email. Click “Get Started”
2. Type in your name and choose a password. Remember with crypto, passwords are more important than ever, if you lose them, you lose money. CoinBase will send you an email, click it and the site will reload asking you for your mobile number.
3. Enter your mobile number and hit “Send Code” this will send a code via SMS, you will need to enter that on the next screen to activate your account. (This is called 2FA - Two Factor Authentication and is a security measure). Once done you are set up.

# 1.1 Buying Ethereum

EXCHANGE SET UP

VERIFYING YOUR ACCOUNT (THIS MIGHT TAKE A FEW GOES, THAT IS OK)

- Once you have set up your account, you will login to see this dashboard
- Scroll down and you will see that you have confirmed your email and phone number. The next step is to click on "Verify your identity", you cannot proceed without this.
- You can select which ID type you will upload; options include your passport or driving license.
- Once you select your preferred ID type, you can select how to upload that.  
**Webcam** allows you to hold your ID in front of the camera on your computer (you might need to click "Allow" for your browser to use the camera).  
**File Upload** I usually take a photo of my ID on my iPhone, transfer to my laptop then just drag & drop to upload. Once verified you will be emailed.

# 1.2 Buying Ethereum

## BANK TRANSFER (THE PREFERRED METHOD)

Deposit EUR

SEPA Deposit

Please include this reference code in your transfer  
Without this code, we cannot deposit these funds into your Coinbase account.

Reference Number

I've copied or written down my Reference Number

Amount	€100.00
Currency	EUR

Recipient

Reference Number	REDACTED
This must be included exactly for your deposit to succeed	
Recipient's IBAN	REDACTED
Recipient Name	Coinbase UK, Ltd.
Bank Country	Estonia
Bank Name	AS LHV Pank
Bank Address	Tartu mnt 2, 10145 Tallinn, Estonia
Recipient Address	9th Floor, 107 Cheapside, London, EC2V 6DN, United Kingdom
SWIFT / BIC	LHVBEE22

I've sent the funds

I'll do this later

Scroll down the dashboard and you will have ticks for email, phone number, identity. The last item to select is **“Adding a Payment Method”**. Select the option for Bank Transfer

1. Write down your Reference Number. Without this, you will transfer money to Coinbase and they won't have anyway to credit it to your account.
2. Enter the details for your SEPA transaction.
3. Coinbase will provide all of the details to complete your transfer via your normal online banking site. Will take 1-3 days to clear. This will then appear in the portfolio section of the dashboard.

All accounts have a deposit limit initially. Bank transfer is higher than credit card. If you need to check, your limits are displayed in your “Settings” page.

# 1.2 Buying Ethereum

## ADDING A CREDIT CARD (FASTER BUT LOWER LIMIT)

The image consists of four screenshots from the Coinbase website, each numbered 1 through 4:

- Step 1:** Coinbase Dashboard. Shows a summary of Bitcoin, Bitcoin Cash, Ethereum, and Litecoin prices. A callout box highlights the "Complete Your Account" section where users can add a payment method.
- Step 2:** "Complete Your Account" page. A modal window titled "Add Account" is open, showing options for "Credit/Debit Card" and "Bank Account".
- Step 3:** "Link Your Card" page. Fields for "Name on card" (Nathan Smale), "Card number" (XXXX XXXX XXXX XXXX), "Expiration" (MM/YY), "CVC" (123), and "Postal code" are filled out. A note at the bottom states: "By adding a new card, you agree to the credit/debit card terms."
- Step 4:** "Link Your Card" page showing two pending transactions of \$1.00. A callout box says: "Verify the two pending holds of \$1.00 or greater from Coinbase." Below it, instructions say: "If there are more than two holds, please enter the two largest amounts. You will not be charged for these transactions." Two input fields show amounts of \$1.43 and \$1.23. A blue "Verify card" button is at the bottom.

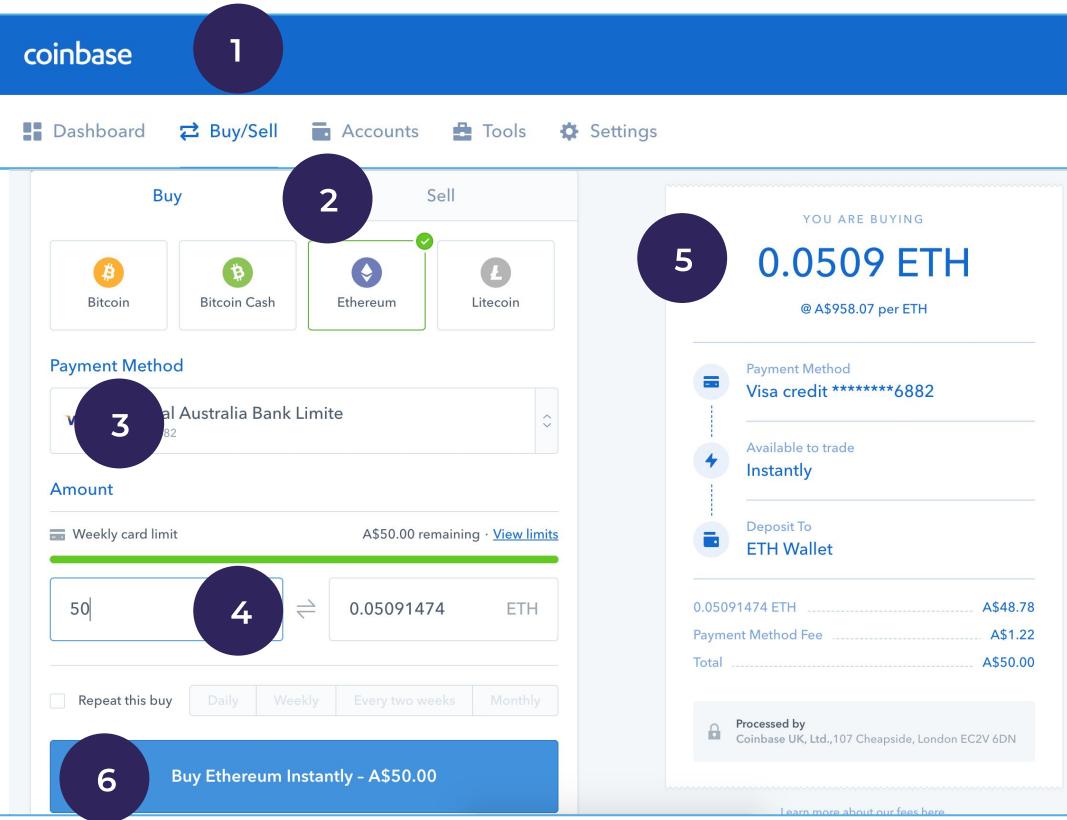

1. Scroll down the dashboard and you will have ticks for email, phone number, identity. The last item to select is **"Adding a Payment Method"**
2. If you select Credit/Debit Card you will be asked to enter your card details.
3. Enter your credit card details for Visa or Mastercard
4. Coinbase will put through 2 or 3 temporary transactions. Log into your online banking, find these transactions and then enter the decimal places for the two biggest of these  
If \$1.42 in banking, enter 42 in the field  
Now click "Verify card"

All accounts have a small limit initially until you have completed a transaction or two.

# 1.2 Buying Ethereum

BUYING ETH

USING YOUR ACCOUNT TO ACTUALLY BUY ETHEREUM

If you did a bank transfer, once funds have cleared you will see your Euro Wallet.

1. Click **Buy/Sell** from the menu
2. Ensure the Buy tab is highlighted. Then click the “Ethereum” button.
3. Payment method should either be “Euro Wallet” or your credit card
4. Enter the amount you would like to purchase. You can enter a figure into either currency field (EUR) or (ETH) and it will calculate. If you click on the field a “Max” button will appear, this give you the most possible ETH for your funds.
5. Check the summary information to ensure it is correct. There are no ‘take backs’ in crypto.
6. If you are happy click the “Buy Ethereum” button.

# 1.2 Buying Ethereum

## FINALISING THE PURCHASE

**1**

YOU ARE BUYING

Total	A\$50.00

Processed by  
Coinbase UK, Ltd., 107 Cheapside, London EC2V 6DN

**Confirm your transaction**

Your bank may charge additional fees for Coinbase credit card purchases. To avoid these fees, switch to debit card or bank account.

**Notice for Australian Users**  
Coinbase only supports digital assets purchases in your country. Sales are not yet available. [Learn More](#).

**Confirm Buy**

**Cancel transaction**

**2**

Your purchase was successful!  
0.0509 ETH will be available in your ETH Wallet instantly.

**3**

**Your Portfolio**

			List	Chart
Ethereum	100%	0.0509 ETH	£26.42	
Bitcoin	0%	0.0000 BTC	£0.00	

1. Check the summary information to ensure it is correct. There are no 'take backs' in crypto. Once you are happy click **Confirm Buy**
2. Assuming it all went through ok, you will see the following success message in the top right corner of the screen. If you visit the dashboard you will see the you portfolio now includes the Ethereum you just purchased and also lists a current value in your local currency.
- 3.

## CONGRATULATIONS.

STEP 1 is complete.  
You own your very own crypto.

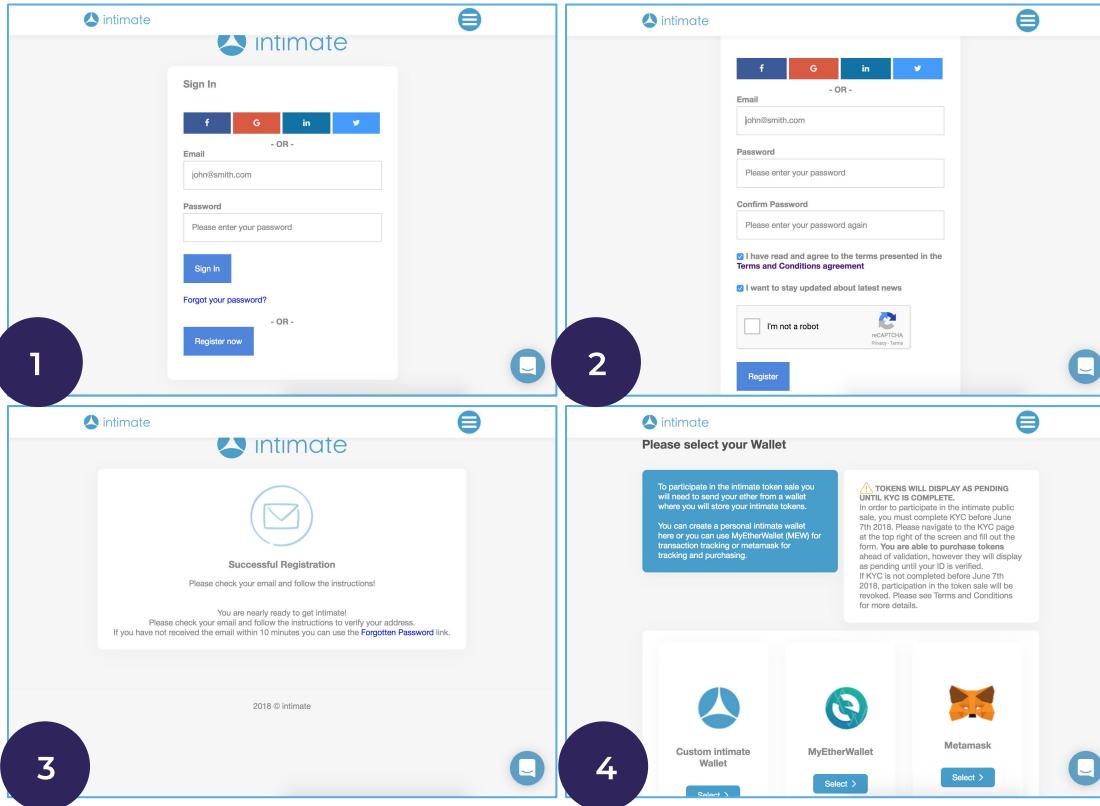

# STEP 2 REGISTER AT INTIMATE

Once you have your Ethereum, the next step is to register an account with intimate.io to buy your intimate tokens.

## 2.1 Register at intimate.io

REGISTERING AT INTIMATE.IO

### SETTING UP YOUR INTIMATE ACCOUNT

Navigate to <https://get.intimate.io> or click the link at the top of <https://intimate.io>

1. Scroll down click **Register Now**
2. Type in your email and choose a password. Click “I am not a robot” Remember with crypto, passwords are more important than ever, if you lose them, you lose money.  
Once you have recorded your passwords safely click “Register”
3. We will send you a verification email. This can take up to 10 minutes. Check your SPAM folder  
If nothing after 10 minutes, go to [get.intimate.io](https://get.intimate.io) and click “Forgot Password” this will resend the email
4. In your email click “Verify”, you will be taken to the site.

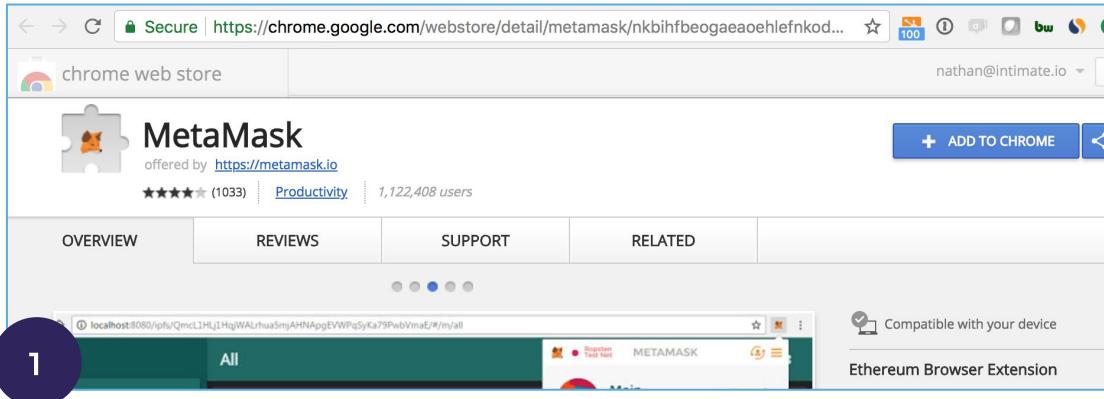

# STEP 3

## SET UP YOUR WALLET

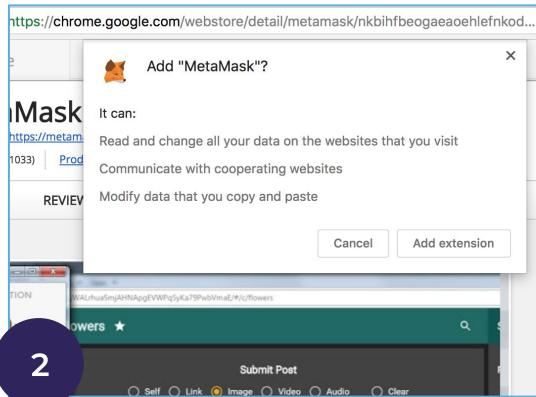

There are multiple options here, we recommend using MetaMask for simplicity. Any ERC-20 wallet will suffice but MetaMask or MyEtherWallet are two very popular wallets.

# 3.1 Get a Crypto Wallet (MetaMask)

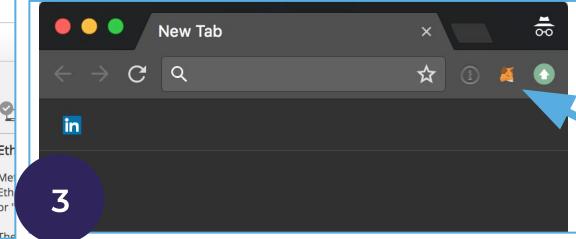

## SETTING UP METAMASK STEP 1

1

2

3

Use the Chrome Browser for this task.

1. Click this link.

<https://chrome.google.com/webstore/detail/metamask/nkbihfbeogaeaoehlfnkodkdbefgpknn>. Then click **Add to Chrome** (right hand side)

2. Click Add Extension

3. To open MetaMask, click on the cute Fox head that appears in the top right corner of the Chrome browser.

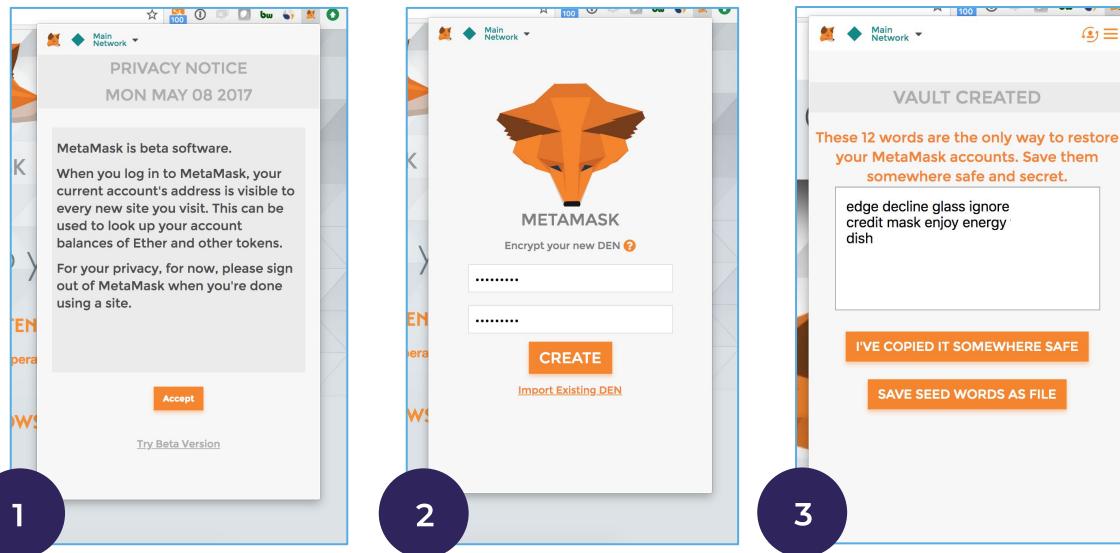

# 3.1 Get a Crypto Wallet (MetaMask)

SET UP  
METAMASK

SETTING UP METAMASK STEP 2

**The only thing more crucial than the password is your seed phrase. Proceed with caution.**

Click the small fox icon in your Chrome browser bar.

1. There are two warnings, Privacy and Terms of Use, read then click **Accept**
2. Create a secure password.  
Remember with crypto, passwords are more important than ever, if you lose them you lose money. Click **Create**.

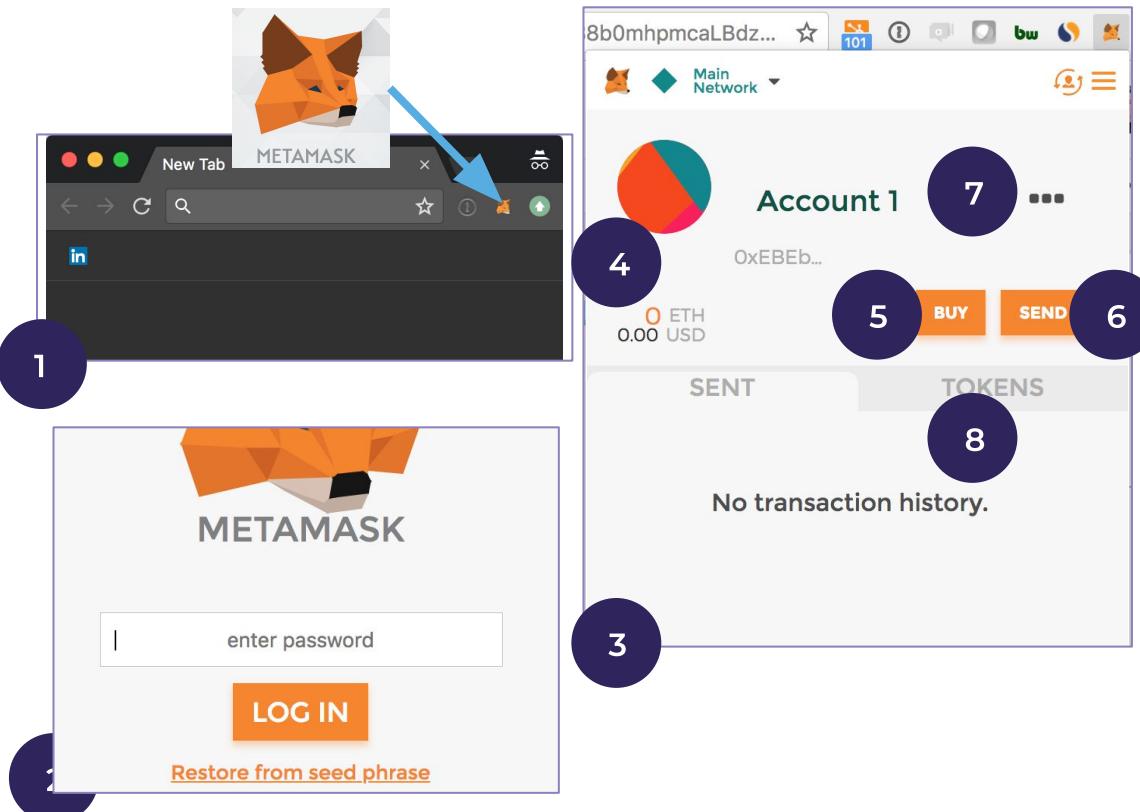

Copy these 12 words and store safely - they are basically your money.

Click **Save seed words as file** then Click **I've copied it somewhere safe**.

# 3.1 Get a Crypto Wallet (MetaMask)

SET UP  
METAMASK

## USING METAMASK

Use the Chrome Browser for this task.

1. Click the fox to open MetaMask
2. Type in your password if required
3. Your MetaMask wallet will open
4. Shows your current balance in ETH and an approximate USD value
5. Allows you to BUY from Coinbase directly to MetaMask (depending on region - not covered in this guide).
6. Allows you to send ETH to another address (or person). We will use this feature heavily.
7. Reveals additional menu that contains the ETH address for this wallet. Important if receiving ITM to this wallet (Or any ERC-20 token)
8. List of tokens that are contained in the MetaMask wallet.

## 3.2 Get a Crypto Wallet (MetaMask)

FUNDING METAMASK

### SEND ETH FROM COINBASE TO METAMASK PART 1

The image contains two side-by-side screenshots. The left screenshot shows the Coinbase 'Accounts' page with three wallets listed: BTC Wallet, BCH Wallet, and ETH Wallet. The ETH Wallet has 0.0509 ETH. A blue circle labeled '1' is over the ETH Wallet section. A blue circle labeled '2' is over the 'Send' button next to the ETH Wallet. The right screenshot shows the 'Send to Wallet' screen. It has fields for 'Recipient' (an Ethereum address), 'Withdraw From' (the ETH Wallet with 0.0509 ETH), 'Amount' (set to 10 GBP, equivalent to 0.01930460 ETH), and a 'Note' field. A blue circle labeled '3' is over the 'Recipient' field. A blue circle labeled '4' is over the 'Edit' button in the bottom-left corner of the Coinbase screenshot. A blue circle labeled '5' is over the 'Recipient' field in the Coinbase screenshot. A blue circle labeled '6' is over the 'Amount' field. A blue circle labeled '7' is over the 'Continue' button.

You will need to log into both Coinbase and MetaMask during this process.

1. Log in to Coinbase and click **Accounts**
2. Click on **Send** from your ETH Wallet in the list to start the process
3. Coinbase will show the Send to Wallet Address screen
4. Open MetaMask and click **...** next to the account name then click **Copy Address to clipboard**
5. Paste this address into the **Recipient** field
6. Enter the amount you would like to send. You can enter a figure into either currency field (EUR) or (ETH). If you click on the field a "Send Max" button will appear, this will send the most possible ETH
7. Click **Continue** to proceed

## 3.2 Get a Crypto Wallet (MetaMask)

FUNDING METAMASK

### SEND ETH FROM COINBASE TO METAMASK PART 2

The image contains four screenshots illustrating the process of sending Ethereum (ETH) from Coinbase to a MetaMask wallet:

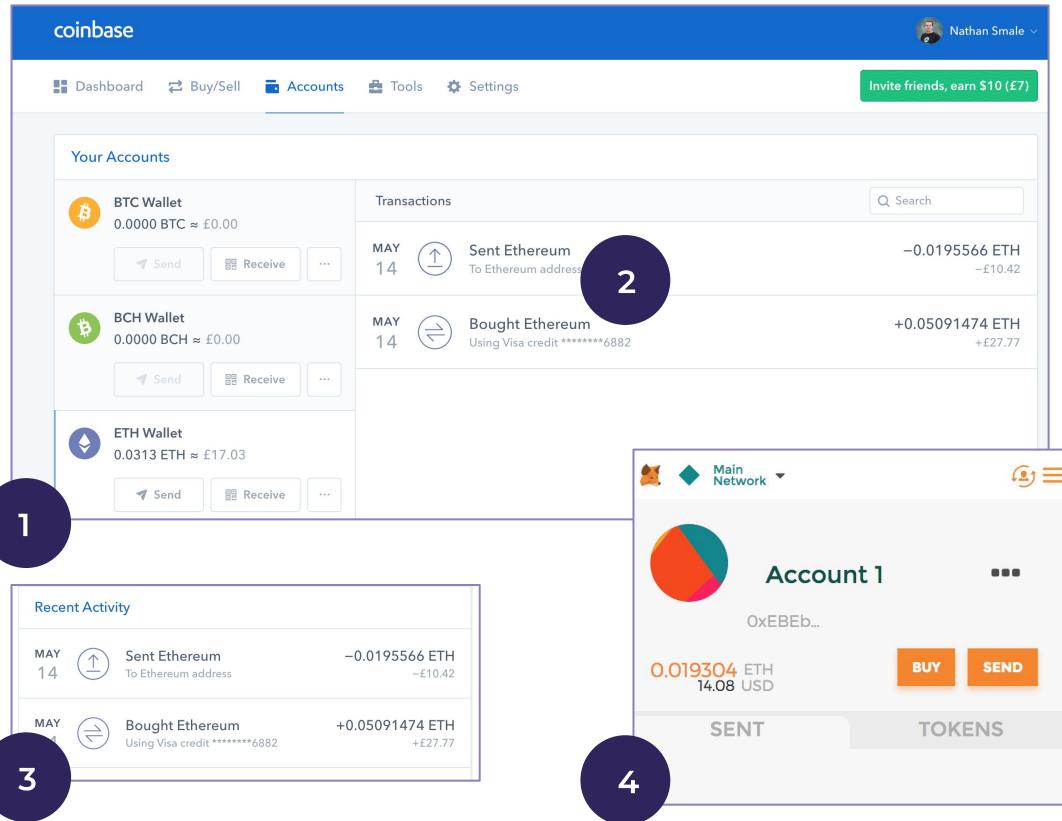

- Screenshot 1:** Shows the "Confirm ETH Send" screen. It displays transaction details: To address 0xEBeBa495d0D76ec56A8450D1563a43C521Bb88c2, Amount 0.0193046 ETH (£10.00), Coinbase fee £0.00, Miner fee 0.000252 ETH (£0.13), and Total 0.0195566 ETH (£10.13). Below this, it asks to enter a 2-step verification code provided by SMS. A green speech bubble icon and a text input field containing "0000000" are shown. A blue button labeled "2" is overlaid on the text input field. A "1" is overlaid on the top-left corner of the screenshot.
- Screenshot 2:** Shows a confirmation message: "Your transaction is on the way!" with a checkmark icon. Below it says "You sent 0.0193046 ETH (£10.00) to an external address." A blue "View Details" button is at the bottom right. A "3" is overlaid on the top-left corner of the screenshot.
- Screenshot 3:** Shows the "Sent Ethereum" screen. It displays the transaction details: -0.0195566 ETH (£10.41). Below this, it shows the recipient address 0xEBeBa495d0D76ec56A8450D1563a43C521Bb88c2, Price per coin £532.30, Confirmations 0, and Fee 0.00025200 ETH. At the bottom right, a yellow "PENDING" button is visible. A "4" is overlaid on the top-left corner of the screenshot.
- Screenshot 4:** Shows the same "Sent Ethereum" screen as Screenshot 3, but with a different timestamp: 14/2018 3:03 PM. The "PENDING" status is still visible at the bottom right. A "4" is overlaid on the top-left corner of the screenshot.

- Once you complete the previous step you get to the 2FA screen (Two Factor Authentication). Coinbase will have sent you a text message with a code to the phone number you have on your account
- Enter the code into the field and click **confirm** to finalise the transaction
- A confirmation screen will appear, click "View Details" to proceed
- The transaction will be marked as "Pending" until the transaction is confirmed. This can be a minute or so. You will receive an email when complete.

## 3.2 Get a Crypto Wallet (MetaMask)

FUNDING METAMASK

CONFIRMING YOUR TRANSACTION HAS BEEN COMPLETE

Once the transaction from Coinbase to MetaMask is complete, you will see the following

In Coinbase:

1. In the Accounts tab. If you click on your ETH Wallet you will see your transactions
2. This transactions will be marked with a Yellow dot and the word Pending until complete.
3. One the Dashboard page you can check your Recent Activity which will be marked as Pending until complete.

In MetaMask

4. You will see the balance increase. For advanced users, you can click the ... and view wallet on EtherScan which is a website that allows you to view all activity for an Ethereum address.

# STEP 4

# BUY INTIMATE TOKENS

Now that you have ETH in your MetaMask wallet you are ready to actually complete the purchase of intimate tokens. Do not send ETH directly from an exchange, you may lose your funds.

# 4.1 Send ETH to get ITM

SENDING ETH

## BUYING ITM WITH METAMASK PART 1

The screenshot shows the [intimate.io wallet interface](https://get.intimate.io/wallet). At the top, there's a navigation bar with the logo, Contact Support, CURRENT WALLET ADDRESS (0x...), Logout, and a KYC link. Below the address, it shows Current Buy Rate: 1 ETH = 600 ITM and a Buy ITM button. A large central section says "Please select your Wallet". It contains two boxes: one about sending ether from a wallet and another about KYC requirements. At the bottom, there are three options: Custom intimate Wallet, MyEtherWallet, and Metamask. The Metamask option is highlighted with a blue circle containing the number 3.

1

2

3

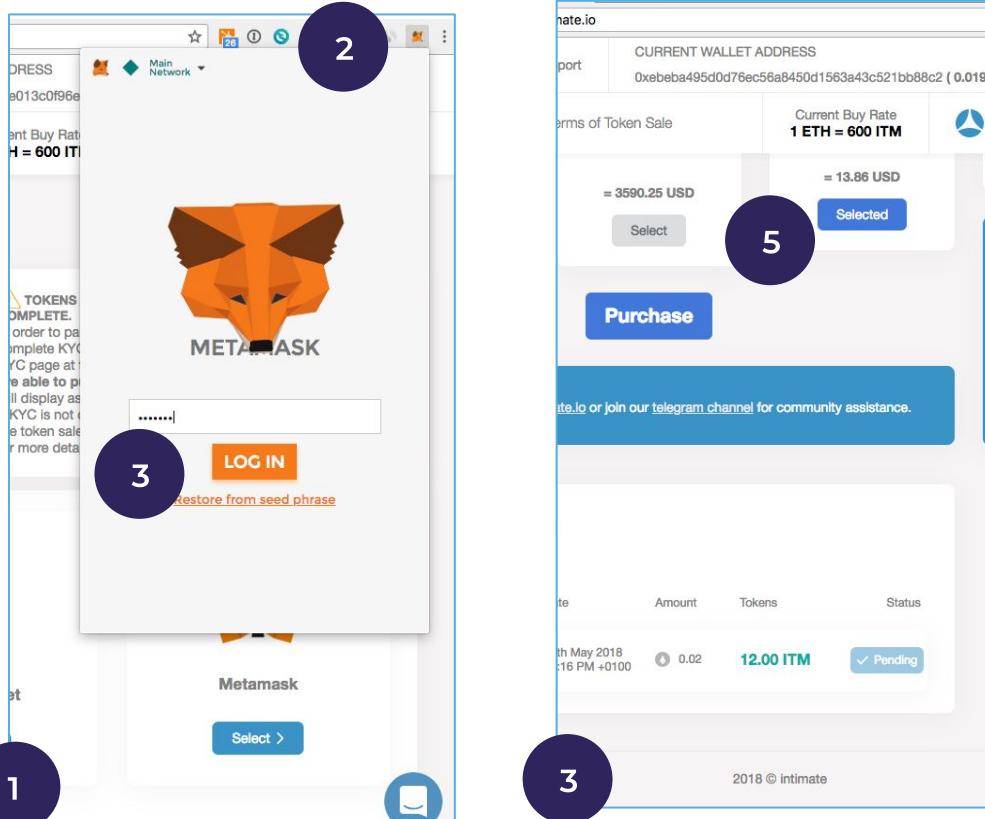

Use the Chrome Browser for this task.

1. Log into <https://get.intimate.io> in your chrome browser
2. Ensure that you have the MetaMask extension installed (see section 3.1)
3. Select the MetaMask Wallet option

# 4.1 Send ETH to get ITM

SENDING ETH

## BUYING ITM WITH METAMASK PART 2

1. If you are not already logged into the MetaMask wallet you will Log into <https://get.intimate.io> in your chrome browser
2. Double click on the MetaMask icon in the browser bar.
3. Enter your password (that you securely stored earlier...) and click **LOG IN**
4. If successfully logged in, MetaMask will show the summary page
5. The summary balance will show you the amount of ETH you have available to purchase ITM with

# 4.1 Send ETH to get ITM

SENDING ETH

## BUYING ITM WITH METAMASK PART 3

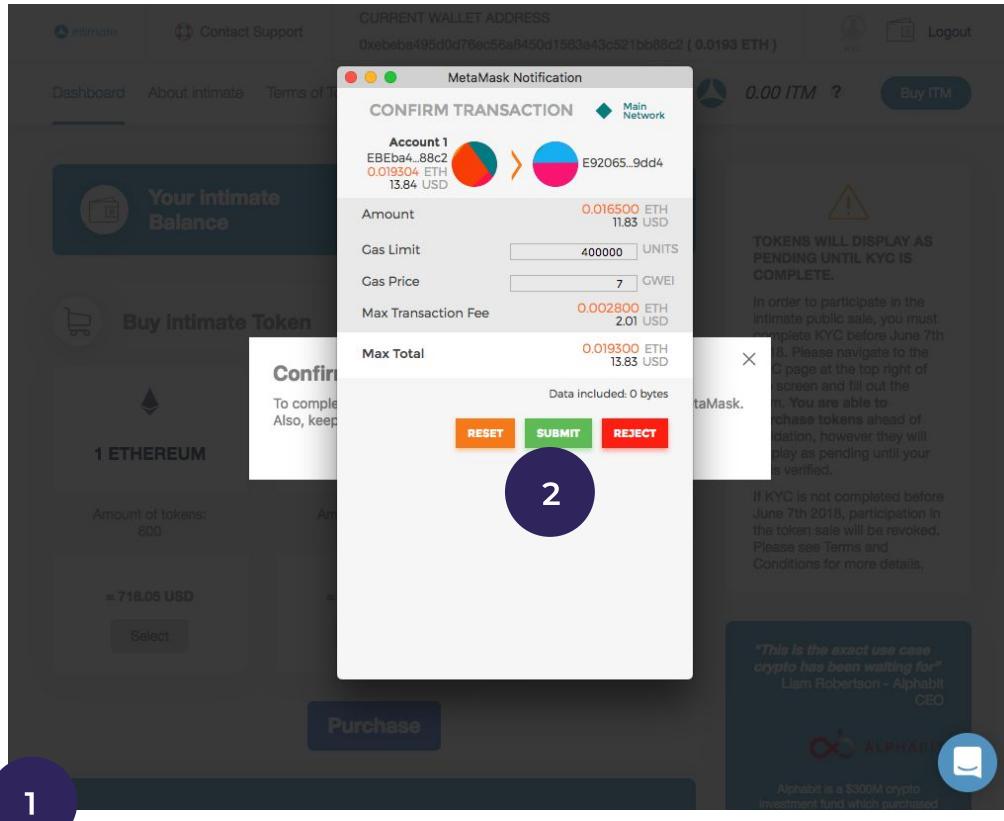

The screenshot shows the [intimate.io wallet interface](https://get.intimate.io/wallet). At the top, it displays the current wallet address: 0xebeba495d0d76ec56a8450d15f... and a balance of 0.0183 ETH. A blue circle with the number 2 is overlaid on this area. Below the address, there's a banner for "Your intimate Balance" showing 0.00 ITM. A blue circle with the number 3 is overlaid on the "Select" button for the 1 Ethereum option. The main section is titled "Buy intimate Token". It lists three options: "1 ETHEREUM" (Amount of tokens: 600, = 718.05 USD, "Select" button), "5 ETHEREUM" (Amount of tokens: 3000, = 3590.25 USD, "Select" button), and "0.0183" (Amount of tokens: 12, = 13.86 USD, "Selected" button). A blue circle with the number 4 is overlaid on the "Selected" button. To the right, there's a note about KYC and token pending status, and a quote from Liam Robertson - CEO of Alphabit. A blue circle with the number 5 is overlaid on the "Purchase" button at the bottom.

1. Once you are logged into MetaMask you can click back onto the webpage
2. You will see that the “Current Wallet Address” now reflects the available balance in your MetaMask wallet
3. You can use the pre-selected 1 ETH or 5 ETH options by clicking **Select**
4. Alternatively, you can enter your own custom amount by entering an amount into the custom field
5. When you are happy with your purchase, click **Purchase** to continue.

# 4.1 Send ETH to get ITM

SENDING ETH

## BUYING ITM WITH METAMASK PART 4

1. You will be asked to complete the transaction via MetaMask. Review all of the details carefully.
2. Click **Submit** to complete the transaction
3. Once complete you will see the following message
4. Hit the **X** in the corner of the dialogue box to close.

# 4.1 Send ETH to get ITM

SENDING ETH

## BUYING ITM WITH METAMASK PART 5

The screenshot shows the intimate.io website interface. At the top, there's a navigation bar with links for 'intimate', 'Contact Support', 'CURRENT WALLET ADDRESS' (0xebeba495d0d76ec56a8450d1563a43c521bb88c2), 'Logout', and a KYC icon. Below the navigation, there's a dashboard with three currency conversion boxes: 1 ETH = 600 ITM (0.00 ITM), 1 ETH = 718.05 USD (Select), and 1 ETH = 3590.25 USD (Select). A large blue button labeled 'Purchase' is centered below these boxes. To the right, there's a testimonial from Liam Robertson - AlphaBit CEO: "This is the exact use case crypto has been waiting for". Below the testimonial, it says AlphaBit is a \$300M crypto investment fund which purchased \$1.1M worth of ITM in February 2018. At the bottom, there's a 'Transactions' section showing a single entry: TX id 0x0acba08e43b9f37e314f..., Date 15th May 2018 04:16 PM +0100, Amount 0.02, Tokens 12.00 ITM, and Status Pending. The entire page is framed by a dark border.

1. Congratulations you have now purchased ITM tokens.
2. You will notice that the status is marked as "Pending", tokens will remain in this state until you have completed KYC (legal requirement which stands for Know Your Customer) in step 4.2. Click the KYC icon in the top right corner to proceed.
3. Click the KYC icon in the top right corner to proceed.

# STEP 5

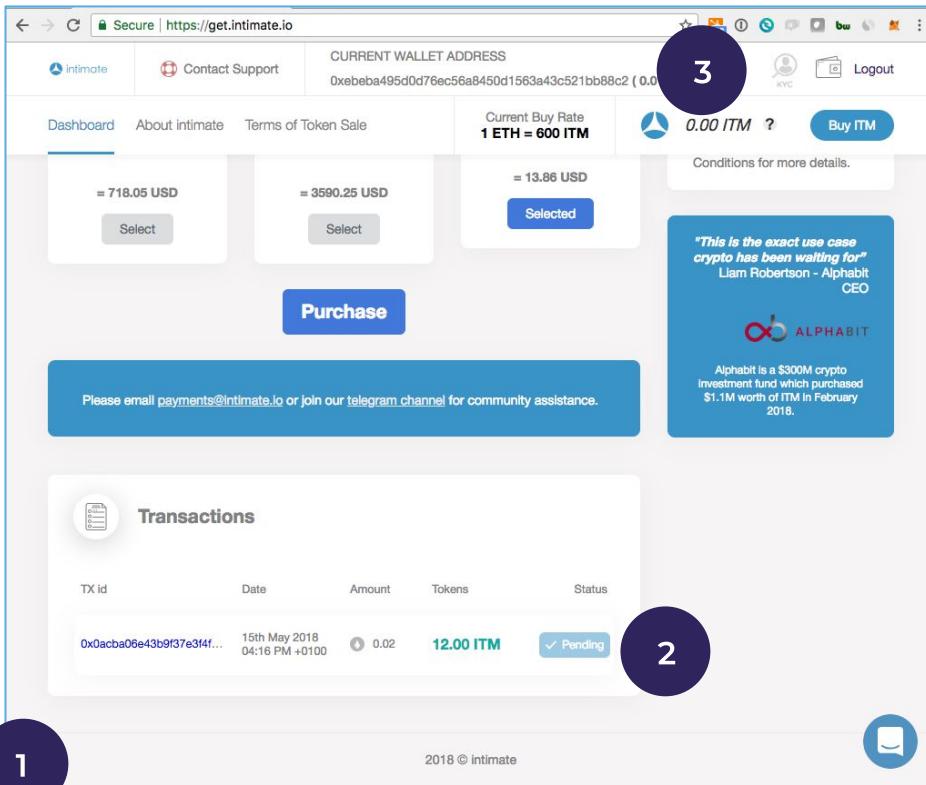

## COMPLETE KYC

Know Your Customer (KYC) is a legal requirement to prove your identity, it is only after this step is complete that we can release the tokens to you.

## 5.1 Completing KYC

KYC

VERIFY YOUR ID SO WE CAN UNFREEZE YOUR TOKENS

1. Congratulations you have now purchased ITM tokens but you must complete the KYC (Know Your Customer) ID verification before the tokens can be released)
  2. You will see your pending transaction here (if this is empty but you have completed the transaction, the blockchain may be slow, do not fear)
  3. Click the KYC icon in the top right corner to proceed.

# 5.1 Completing KYC

KYC

VERIFY YOUR ID SO WE CAN UNFREEZE YOUR TOKENS

The screenshot shows the KYC process on the Intimate.io website. At the top, it displays the current wallet address (0xb6ba49520d76ec55b845001563a43c52115b8802), a current buy rate of 1 ETH = 600 ITM, and a balance of 0.0193 ETH. Below this, there's a 'Buy ITM' button.

**KYC - Know Your Customer.**  
Status: Not submitted

At Intimate.io we take KYC verification very seriously. Please complete all of the information below so that we can ensure we are following the correct process. If this process is not followed correctly or you do not provide sufficient identification, you will not be eligible to purchase intimate tokens.

If you have any questions or concerns about this process, please email [kyc@intimate.io](mailto:kyc@intimate.io) and we will be happy to assist you.

**Step 1: Personal ID Verification Details**

1. Enter your personal details as they would be recorded by your local government (i.e. full name, registered address etc)

2. Enter your last name

3. Enter your country

4. Enter your state

5. Enter your postal code

6. Enter your address 1

**Step 2: Address 2**

Address 2

**Personal ID Verification Details**

Please upload proof id identity such as Passport, Drivers License, Identity Card, Residence Permit.

For providing quick automatic KYC process, please upload files in the order described below:

1. Document front-side image data (Passport, Drivers License, Identity Card, Residence Permit). 400KB minimum size, 4MB maximum size, color only.
2. Document back-side image data (Passport, Drivers License, Identity Card, Residence Permit) showing your address. 400KB minimum size, 4MB maximum size, color only.
3. Document face image data. 400KB minimum size, 4MB maximum size, color only.

Doc type: Passport

Files: Passport.JPG

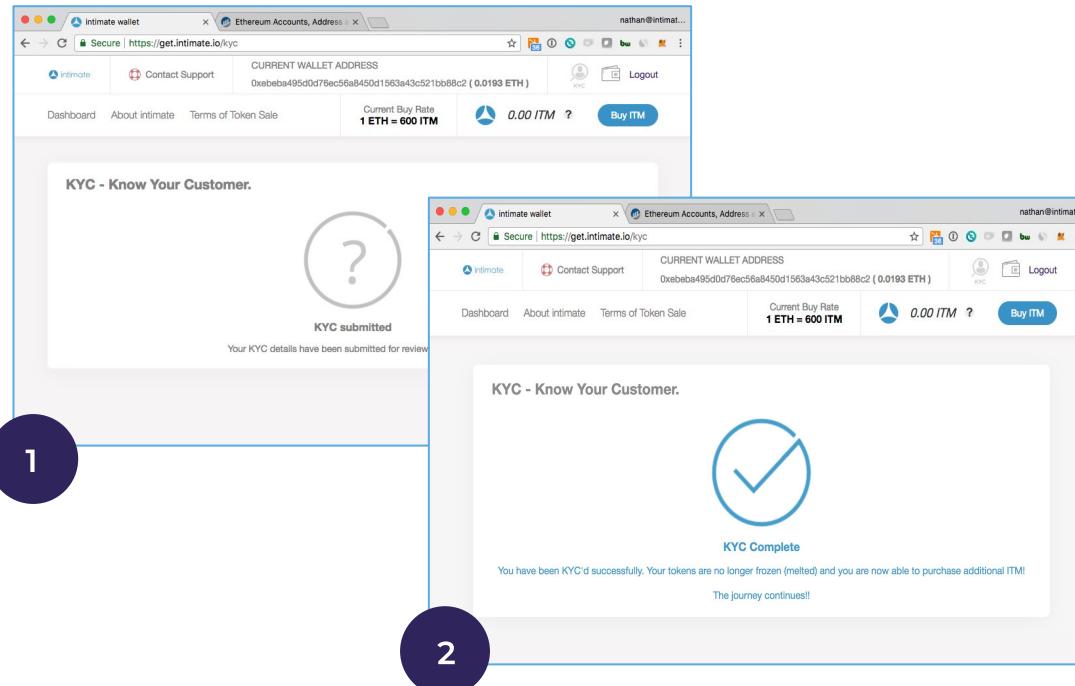

Submit KYC

1. Enter your personal details as they would be recorded by your local government (i.e. full name, registered address etc)
2. You will need to upload evidence of your identity, ensure the country is correctly set to the country to match that of your ID documentation.
3. Scroll down to upload your ID
4. Select which document type you would like to use (Passport, Driving License or Residency Card)
5. Click the small blue cloud to upload an image of your document (photo of the front and back of the ID as appropriate). Select one item at a time to upload.
6. Once you have finalise the documents click **Submit KYC** to proceed.

# 5.1 Completing KYC

KYC

VERIFY YOUR ID SO WE CAN UNFREEZE YOUR TOKENS

1. Your KYC will be validated by the third party ID verification company that handles all of our KYC tasks.
2. This may take 24-48hrs, but is usually much quicker. If you haven't been validated after 48hrs, please do get in touch with [kyc@intimate.io](mailto:kyc@intimate.io) or one of the team on telegram. Once validated, your tokens should be visible in your transaction list on the main page.

intimate
